5(b). Blood Donor & Camp Management – Zoho Creator Command Center Page

Aim

To design and build a centralized Dashboard Page in Zoho Creator for the existing Insurance Claim Request & Processing Management application, providing a unified workspace to monitor insurance claims, claim investigations, approvals, settlements, and requested claim amounts.

Page Elements Used

Page Element Type	Element Name
Panel	Total_Claims_Panel
Chart	ClaimType_Distribution_Chart
Chart	Claim_Status_Overview_Chart
Report	All_Claims_List
Form Access	Claim_Request_Form
Form Access	Claims_Spreadsheet
Report Access	Claim_Status_Kanban
Report Access	ClaimType_Amount_Summary

Page Layout (Section-wise)

- **Section 1: Overview Strip**
  - Total Claims Panel: Displays the total number of registered insurance claims.
  - Claim Type Distribution Chart: Visually represents the distribution of claims by type using a Pie Chart.
  - Claim Status Overview Chart: Provides a graphical overview of claims by status, such as Submitted, Under Investigation, Approved, Settled, and Rejected.
- **Section 2: Blood Request Monitoring**
  - All Claims List: Displays claim records, including claimant name, policy number, claim type, requested amount, and claim status.
  - Provides quick access to claim details for monitoring and processing.

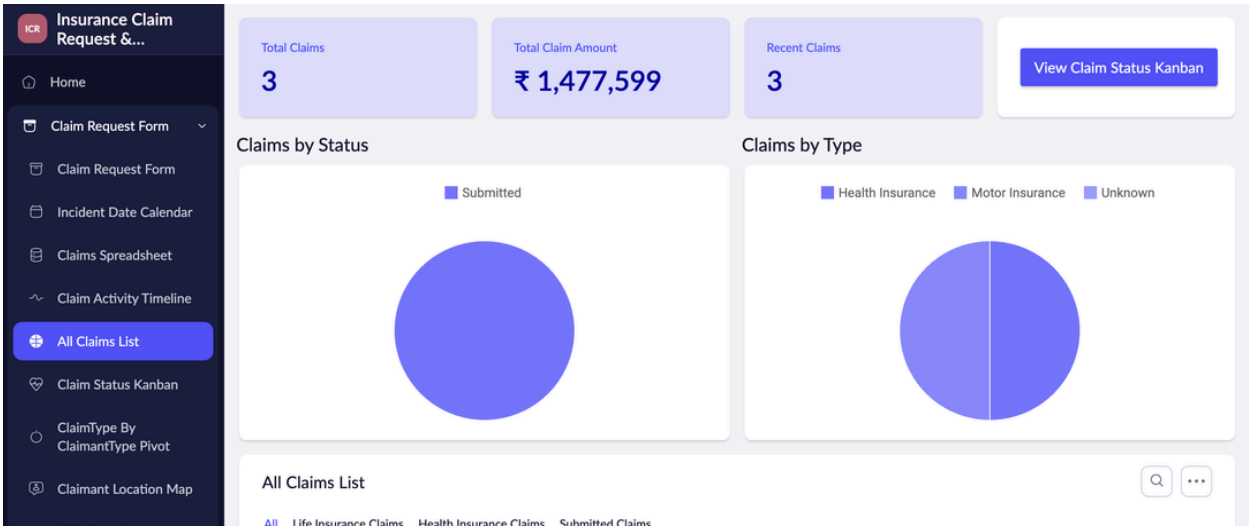

- **Section 3: Donor Management**
    - Provides access to the Claim Request Form to register and maintain insurance claim information.
    - Supports access to claim records and their details.
- **Section 4: Camp and Donation Management**
    - Provides access to the Claim Status Kanban report to monitor claim-processing stages.
    - Supports tracking investigations, surveyor assignments, approvals, and
    - rejections.
- **Section 5: Inventory Management**
    - Provides access to the ClaimType Amount Summary report to review claim counts, total requested amounts, and average requested amounts.

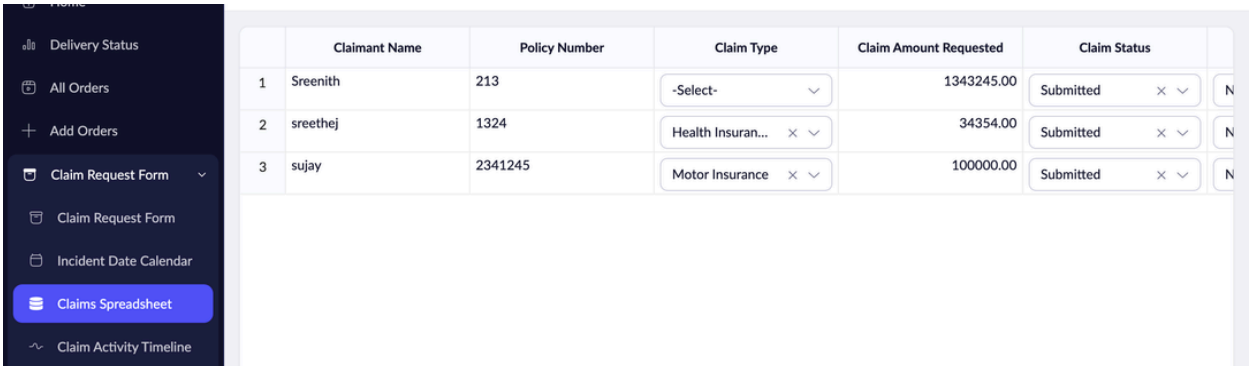

to

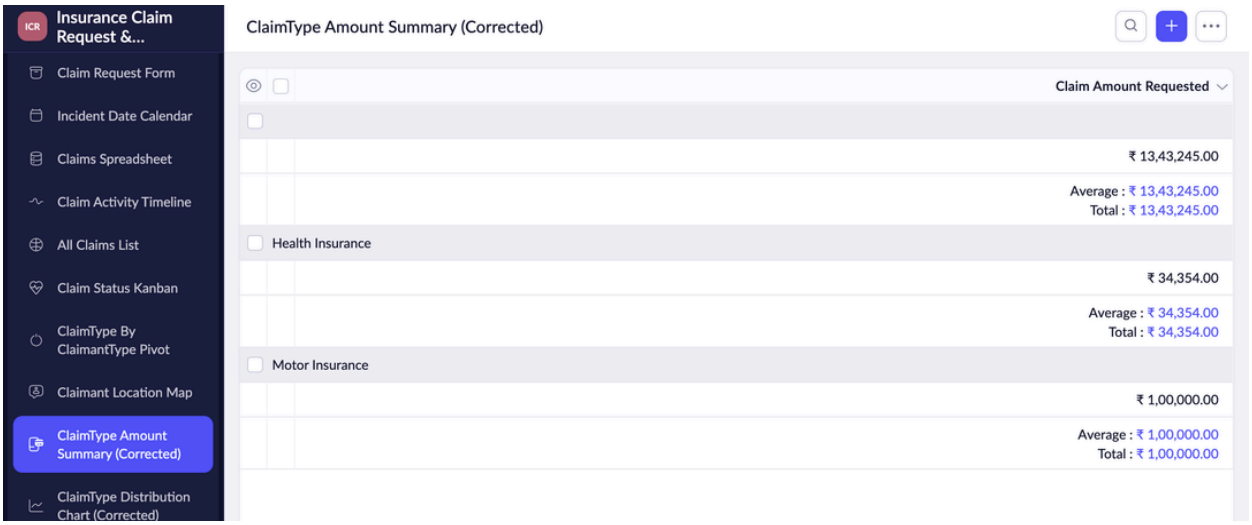

The dashboard acts as a centralized monitoring page, while the individual forms and reports are used to enter, view, and manage claim information.

Procedure

1. Open the Insurance Claim Request & Processing Management application in Zoho Creator.
2. Create a new Page using Page Builder or open the existing Home page for editing.
3. Add a panel to display the total number of insurance claims.
4. Add a Pie Chart to visualize the distribution of claims by Claim Type.
5. Add a second chart to represent claim distribution by Claim Status.
6. Add the All Claims List report to the dashboard for quick access to claim records.
7. Add shortcuts to the Claim Request Form, Claim Status Kanban, and ClaimType Amount Summary.
8. Arrange the panel, charts, reports, and shortcuts into a clear dashboard layout.
9. Save the page and open it in Live mode.
10. Verify that the dashboard components are visible and that the forms and reports can be accessed correctly.

Result

A centralized Dashboard Page for the Insurance Claim Request & Processing Management application was designed for implementation in Zoho Creator. The dashboard provides an overview of total claims, claim-type distribution, claim statuses, and claim records, along with shortcuts for claim registration, investigation monitoring, and financial summaries.
